ASSIGNMENT-4

[24-11-2025]

1)Write a program to find first and last digit of a number?

```
#include<stdio.h>

Int main()

{

        Int num ,first ,last;

        Printf("Enter a number");

        Scanf("%d",&num);

        Last=num%10;

        First=num;

        While(first>=10)

        {

                First=first/10;

        }

        Printf("first digit=%d\n",first);

        Printf("last digit=%d\n",last);

        return 0;

}
```
